HAIWEN HUANG

Social simulation · Generalization of vision and multimodal models

+49 15252100386 | andrehuang0@gmail.com | andrehuang.github.io | Google Scholar | github.com/andrehuang

POSITIONS

Max Planck Institute for Intelligent Systems, Tübingen, Germany — July 2026 – present
Postdoctoral Researcher

- Group of Prof. Moritz Hardt
- Research on social simulation: what it would mean for an AI simulator to understand society, and how to get closer to that goal

Google, Zurich, Switzerland — 2025
Research Intern

Megvii Research (Face++), Beijing, China — July 2019 – Sept. 2020
Research Scientist, Face Recognition Team

- Advisor: Xinyu Zhou
- Billion-scale face recognition data annotation; out-of-distribution detection for facial data

EDUCATION

University of Tübingen, Tübingen, Germany — Jan. 2022 – July 2026
PhD in Computer Vision

- Autonomous Vision Group & Bosch Industry-on-Campus Lab; supervisors: Andreas Geiger, Dan Zhang
- Research: improving the generalization of vision and multimodal models across tasks and domains
- Defended July 13, 2026

University of Oxford, Oxford, UK — Oct. 2020 – Sept. 2021
MSc in Computer Science, with Distinction

- Dissertation: “On Representation Learning for Deterministic Uncertainty Estimation”; supervisor: Yarin Gal

Peking University, Beijing, China — Sept. 2015 – July 2019
BSc in Computational Mathematics

- Cumulative GPA: 3.73/4.00, Major GPA: 3.80/4.00; advisor: Bin Dong

University of California, Los Angeles, USA — Sept. 2017 – Feb. 2018
Exchange Student, Department of Statistics

- CSC Scholarship recipient; GPA: 4.0/4.0; advisors: Yingnian Wu, Song-Chun Zhu

AWARDS AND HONORS

CVPR Outstanding Reviewer Award	2025
NeurIPS Top Reviewer Award	2024
Best Paper Runner-Up, Safe AI Workshop at AAAI	2021
Outstanding Graduate of Beijing (top 1% in the university)	2019
CSC Scholarship for exchange study at UCLA	2017
Yang Fuqing & Wang Yangyuan Academician Scholarship (top 1% in academic merit and potential)	2016

SERVICE

- Reviewer: NeurIPS, CVPR

TECHNICAL SKILLS

- **Frameworks:** PyTorch, TensorFlow, NumPy, scikit-learn, Hugging Face, Gradio
- **Computer vision:** classification, object detection, (interactive) segmentation, depth/normal estimation, video object segmentation, tracking
- **Foundation models:** DINOv2, CLIP, SigLIP, Mask2Former, Stable Diffusion, Flux; parameter-efficient fine-tuning (LoRA, ControlNet, T2I adapters); LLM APIs for text and multimodal tasks
- **Data-centric evaluation:** data collection, augmentation and synthesis; benchmarking foundation models on VQA and open-vocabulary segmentation
